

March 14, 2016

The Honorable Mike Doyle  
United States House of Representatives  
239 Cannon House Office Building  
Washington, DC 20515

Dear Representative Doyle,

We are writing to you on behalf of our organizations and our members to ask you to support the ongoing efforts to pass an update to the Toxic Substance Control Act (TSCA). The House of Representatives and Senate made historic strides during the first session of the 114<sup>th</sup> Congress with each chamber passing their own version of TSCA reform.

Our members are proud of our connection to Pennsylvania, the valuable role we and our employees play within communities throughout the Keystone State, and the contributions we make to Pennsylvania's economy.

It is critical to the many industries and businesses that rely on chemical products that the Congress finally reform TSCA. With both chambers passing similar legislation to reform TSCA, it is imperative that any key differences are worked out between both parties and chambers quickly. With each passing day, Congress's legislative calendar is becoming shorter and filled with other pressing issues. TSCA reform has near unanimous support from both chambers, which is reason enough to finalize these efforts and pass the first reform to TSCA since its inception in 1976.

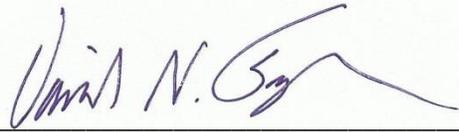

We are extremely grateful for the friendship and support you have given us throughout your time in Washington. The work you have done with your colleagues on the House Energy and Commerce Committee to further TSCA has been invaluable to the citizens of Pennsylvania.

We urge you to work with your colleagues both across the aisle and across the Capitol to make the reconciliation of the House and Senate bill a top priority. Additionally, we respectfully request that you contact Ranking Member Pallone to show your support for reconciliation and express the urgency to finalize TSCA reform.

Sincerely,

Jeff Logan  
President  
Pennsylvania Chemical Industry Council

Matt Smith  
President  
Greater Pittsburgh Chamber of Commerce
